## Books Reviewed

### *(Volume 12)*

Factor Analysis and Related Methods, by R. P. McDonald, 3:308

Goodness-of-Fit Techniques, edited by Ralph B. D'Agostino & Michael A. Stephens, 4:412

Latent Variables Models: An Introduction to Factor, Path, and Structural Analysis, by John C. Loehlin, 4:410

Summing Up: The Science of Reviewing Research, by Richard J. Light & David B. Pillemer, 3:302

## Book Review Authors

Koziol, James A., 4:412

Wardrop, James L., 4:410

Widaman, Keith F., 3:308

Wilkinson, Ian, 3:302

## Key Word Index

### *(Volume 12)*

ANOVA 1:87

Causation 2:101
Correlation 2:101, 3:294

Descriptive statistics 4:395

EM algorithm 1:76
Equipercentile equating 1:33

Group-by-item interaction 1:87
Grouped data 4:395

IRT 4:339
Item bias 1:87
Item response curve 1:76

Linear equating 1:33

Mean squared error 4:395
Median 4:395
Monte Carlo 3:294
Multivariate independence 3:294

Path analysis 2:101
Path models 2:101
Percentiles 4:395
Power 1:45

Rasch model 1:76
Regression 2:101
Robust estimation 4:339

SD-line 3:235
Scatterplot 3:235
Simulation 4:339, 4:395
Small calculators 4:395
Sphericity 3:294
Structural equation models 2:101

Test bias 1:87
Type I errors 1:45

Variance equality 1:45

XTREE 4:339
